Highly Organized

Timely Communication

Teamwork

Self-Growth and Reflection

Solution Based Approach

WORK EXPERIENCE

Self-Employed Web Developer

Custom Web Apps by Audrey, LLC

04/2023 - Present

Client: Sacred Society LLC

- Communicated with the Director of Operations to modify the company Shopify website.
- Worked on the theme files including JSON, Liquid, CSS, and JavaScript.
- Hosting server code for custom functionality (including custom SendGrid emails) on a Digital Ocean droplet (JavaScript, Express.js, Node.js).
- Using MongoDB to implement customized discounts (integrating with existing Shopify discount functionality) to have a set expiration based on specific user action (expiration is different for each user).
- Estimated the timing and provided a contract to the client based on initial established requirements.
- Created a Google Sheet for time logs and shared with the client - added to it daily (date, hours spent, tasks completed)
- Sent weekly invoices based on the auto-calculations I set up on the Google Sheet

Full Stack Web Developer

Fine Mountain Consulting/Longma Logic

02/2022 - 03/2023

Consulting Firm

Achievements/Tasks

- Primary developer on a full-stack app (skills used: MERN stack and AWS).
- Worked on a custom 2-factor authentication login page for companies that use Knack (skills used: Twilio, React.js, Knack, Google Firestore).
- Handled tasks for multiple clients at a time.
- Created a Google Sheet to keep track of tasks (client name, task details, completion date estimate, time estimate, time spent, and status of completion) and shared it with my project manager.
- Created Jira tickets with task details, code planning, and time estimates.
- Communicated with clients weekly by email and/or meetings to understand the needs and discuss various possible solutions.
