Sample Work

Vacation Planning App
Repo: https://github.com/Korbin-Sargent/vacation-planning-app
A user can store all the details about a trip they are planning in one location. The user can create tasks and keep track of the budget for each trip. React, JavaScript, MongoDB, Mongoose and CSS were used.

Teacher-Verse
Repo: https://github.com/audrey-g37/teacher-verse
Teachers can store student information, like attendance, communication with guardians, and behavior notes all in one place. Handlebars, CSS, JavaScript, Node.js, and MySQL were used.

Team Profile Generator
Repo: https://github.com/audrey-g37/Team-Profile-Generator-HW
This app creates an html file to display employee's information. The user is prompted through the command line to answer questions. HTML, CSS, JavaScript, and Node.js were used.
